**Please Mail Your Ballots
 Immediately**

The official ballot has been mailed to each Corporate member of the Wisconsin Architects Association and must be delivered to the Secretary not later than 12:00 noon, Thursday, February 18. As noted on the program for the Fourth Annual Convention, announcement of the election of Directors for 1953-54, will be made at the Business meeting Thursday evening, February 19.

An interesting program has been arranged by the Committee and the Executive Board is anticipating a largely attended Convention.

Among the speakers, coming from various parts of the country, is John T. Gartrell, Vice President of Timber Structures, Inc., Kansas City, Missouri. Preceding the showing of a film depicting the timber fabricating industry, he will present a 15 minute talk, "This Fascinating Industry."

* * *

PRODUCERS' COUNCIL EXHIBIT

Following Mr. Gartrell's talk, the remaining hour, 11:30 to 12:30 preceding the luncheon, will give the architects an opportunity to view the Producers' Council exhibits and the door prizes on display. The close of the afternoon, between 5 and 6 o'clock, will be given over to further inspection of the exhibits and the awarding of the door prizes by the "Producers." From 6 to 6:30 o'clock, preceding the dinner, the Producers' Council will entertain at cocktails. James M. Mitchell, President of the Milwaukee Chapter, Producers' Council, has appointed Quentin Q. Carey Convention Chairman. James M. Smith is Secretary.

Members of the Milwaukee Chapter of the Producers' Council, Inc., all of whom will be represented in the exhibit, are: Aluminum Co. of America, J. R. Patterson, Representative; American Radiator & Std. Sanitary Corp., F. R. Dannies, Rep., R. J. Miller, Alternate; Kimball Glass Co., E. C. Lynfoot, Rep.; Armstrong Cork Co., D. D. Woodward, Rep., H. P. Roos, Alt.; Arnold Equipment Corp. (Great Lakes Steel Co., Stran Steel Div.) Arnold Holming, Jr., Rep., Robert Holming, Alt.; Bell & Gossett Co., Frank Hackett, Rep.; Butter Hardware Co. (Yale & Towne Mfg. Co.) J. J. Kasseckert, Rep., L. R. Meister, Alt.; Philip Carey Mfg. Co., F. J. Jansen, Rep.; Ceco Steel Products Co., John T. Hanlon, Rep., R. P. Hanlon, Alt.; Chamberlin Co. of America, J. W. Rapp, Rep.; Best Lumber Co. (Gate City Sash & Door) Louis Best, Rep.; Hillyard Chemical Co., Gil H. Young, Rep.; Hunter Douglas Corp., R. Sheldon, Rep.; Jackson & Foster (Detroit Steel Prod. Co.) H. E. Foster, Rep., F. F. Jackson, Alt.; Johns-Manville Sales Corp., Gerry Ahrens, Rep., Robert

**KOHLER PLUMBING FIXTURES***New Styling . . . time-tested quality*

Kohler fixtures in new designs — the Cosmopolitan Bench Bath and Gramercy lavatory — offer modern, clean-cut design, years of satisfactory service.

The bath is of non-flexing iron, cast for strength and rigidity that protect the lustrous Kohler enamel. A low front, bench rim, slope end and flat bottom make it safe and comfortable. The vitreous china lavatory is roomy, has integral soap d'shes, convenient shelf. Glass-hard surfaces insure easy cleaning.

Chromium-plated fittings match the fixtures in style and quality. The Niedecken mixer simplifies control of water temperature for shower and bath. Kohler Co., Kohler, Wis.

KOHLER OF KOHLER

Glenn Stanton, F. A. I. A., President, The American Institute of Architects
Who Will Address Members and Guests of The Wisconsin Architects
Association at The Association's Annual Banquet,
Friday Evening, February 20

Glenn Stanton, F.A.I.A., who is serving his second term as President of The American Institute of Architects, was born in Humboldt, Iowa, May 17, 1895. In 1918 he received his AB degree at the University of Oregon and his BS in architecture in 1919. In 1921 he received his Master of Arts degree from the Massachusetts Institute of Technology, finishing his schooling that year with his inclusion in the American Students' Mission to Europe. From 1925 to 1935 he was a member of the firm of Whitehouse, Stanton and Church, Portland, entering private practice in 1935.

In addition to his being a Fellow of The American Institute of Ar-

Glenn Stanton

chitects, Mr. Stanton is an Honorable Fellow of the Royal Architectural Institute of Canada, and Honorary Corresponding Member of the Philippine Society of Architects. He was Vice President of the A.I.A., 1948-51. He is past president of the Oregon Chapter, A.I.A., the Oregon State Board of Architects Examiners, and the Portland City Planning Commission.

A community leader, he is a past director of the Portland Civic Theater and the Oregon Building Congress. From 1939 to 1951 he was a member of the Metropolitan Board, YMCA, and at present is a member of the Board of Directors of the Portland Chamber of Commerce.

Architectural Concrete

ideal for schools of any size or type

The sharp increase in the birth rate during and since World War II now is reflected in a greatly expanded population of school age. Construction of buildings to house these students lags behind requirements.

In filling these needs architects can serve the interests of students, teachers, school boards and taxpayers best by designing in architectural concrete.

The outstanding characteristics of architectural concrete—rugged strength, maximum firesafety and unexcelled resistance to the elements—not only meet all structural requirements but also provide students and teachers with the utmost comfort and protection. Moreover, the enduring beauty which can be designed into architectural concrete buildings creates schools the city can be proud of for generations.

Architectural concrete schools best serve school boards and taxpayers too. The moderate first cost of architectural concrete+its low maintenance cost ÷ its long years of service=**low annual cost.**

Architectural concrete is a versatile structural material adaptable to single or multi-story schools of any size or style. Even ornamentation can be cast integrally—and economically—with structural parts.

For more information on designing architectural concrete schools write for free copy of "Concrete in Schools." Distributed only in the U. S. and Canada.

PORTLAND CEMENT ASSOCIATION

735 N. Water St., Milwaukee 2, Wisconsin

A national organization to improve and extend the uses of portland cement and concrete . . . through scientific research and engineering field work

These two Kansas schools, in Hazelton (above) and in Hanston, designed by Hibbs and Robinson, architects and engineers, of Wichita. Jenson and Ridge, also of Wichita, contractors.

A RAINBOW OF SOFT COLORS

Yes — Roddiscraft plywood offers almost countless natural wood colors —

Browns — all shades — light, medium and dark.

Light blondes—tawny blondes — yellow, pink and reddish casts.

Light or Dark Tones —

There's a great variety of tones in different woods and within the same woods — a shade to meet every decorating need.

With Plywood Paneling You Can Emphasize —

Vertical lines —
Horizontal lines —
or have a Parquetry pattern

RODDISCRAFT PLYWOOD PANELING

Background for Beauty

BACKGROUND can make or break the furnishings in any room. Roddiscraft hardwood plywood paneling offers a wide choice of background.

Soft natural wood colors blend easily with color schemes — do not restrict the use of high color in draperies and furnishings — do not inhibit change.

You can recommend Roddiscraft plywood for economy too. It never has to be painted, papered, patched or scrubbed. That means substantial savings over the years.

Roddiscraft plywood will stand behind your recommendation. The finished job will more than meet your expectations. Roddiscraft is a craftsman's product — from veneer selection to final sanding.

Samuel J. Sutherland

Samuel J. Sutherland, 51, a member of the Wisconsin Architects Association and The American Institute of Architects, died Sunday, January 25, at St. Mary's Hospital, after an illness of two months. Funeral services were held the following Tuesday at St. Paul's Episcopal church. Cremation was at Forest Home Cemetery.

Mr. Sutherland had been associated with the architectural staff of the Milwaukee School Board since 1927 and upon the retirement of Guy E. Wiley in 1951, was appointed Chief Architect.

Mr. Sutherland was born in Chicago and was graduated from the Architectural Engineering school at the University of Minnesota in 1923.

Surviving are his wife, Hazel, and sons, William and John, and his parents, Mr. and Mrs. Stuart S. Sutherland, Minneapolis.

Why it pays to use**STRAN-STEEL FRAMING****in all commercial and industrial CONSTRUCTION**

The big advantage of Stran-Steel framing is *measurable* in time and money saved.

You profit from the *nailability* of Stran-Steel framing—an exclusive patented feature.

You see, your workmen can *nail* inside or outside material to Stran-Steel studs, joists and purlins. Often, sub-assemblies can be made by shop labor, speeding the final, on-the-site assembly of framing sections.

If you are interested in lower "in place" costs it will pay you to get our estimate on fabricating and erecting the steel framing needed in your new building. No obligation on your part.

creates interior beauty! Note how trim, narrow face is all that is exposed — for smart simplicity, easy cleaning. Construction-wise, note how expanded wing provides perfect plaster bond, and how casing bead acts as a screed to separate plaster from other material.

Create Smart, Appealing Interiors with *MILCOR**

Window and Door Casing Bead

MILCOR Casing Bead creates the clean, modern beauty and spacious simplicity that today's buyer demands. This is because the smooth attractive face of the steel bead blends perfectly with surrounding walls, permitting flush door and window openings. Milcor Casing Bead is made of steel for a lifetime of beauty and extra plaster protection. It is easily installed and finished.

Either solid or expansion wing-types can be obtained to meet all ordinary requirements, and to meet many special and difficult needs as well. A variety of styles is available. All are straight and uniform to permit perfectly fitted mitres and neat, flush joints.

For full information on Milcor Casing Bead and other products in the complete line of Milcor Metal Lath and accessories, write for Revised Milcor Manual.

INLAND STEEL PRODUCTS COMPANY

*Reg. U. S. Pat. Off.

Formerly Milcor Steel Company

4127 WEST BURNHAM STREET

MILWAUKEE 1, WISCONSIN

BALTIMORE 24, MD. — 5300 Pulaski Highway • BUFFALO 11, N. Y. — 64 Rapin St. • CHICAGO 9, ILL. — 4301 S. Western Avenue Blvd. • CINCINNATI 25, OHIO — 3240 Spring Grove Ave. • CLEVELAND 14, OHIO — 1541 E. 38th St. DETROIT 2, MICH. — 690 Amsterdam Ave. • KANSAS CITY 8, MO. — South West Blvd. and State Line • LOS ANGELES 58, CALIF. — 4807 E. 49th St. • NEW YORK 17, N. Y. — 230 Park Ave. • ST. LOUIS 10, MO. — 4215 Clayton Ave.

Use of Milcor Casing Bead around door openings—Finished door frames (the same width as the partition or wall) are to be erected before lathing and plastering. Casing should be held back from the edge of the jamb a minimum of 1/4" to provide sufficient space for door hinges. Since the finished floor is laid after plastering, casing bead on sides of the opening should be held at established finished floor level.
